SUMMARY

Web developer who loves turning ideas into fast, clean websites people enjoy using. Over the past 2.5 years I've built WordPress, Webflow and Next.js products for clients in the US and beyond, from enterprise marketing sites to full SaaS applications. I care about performance (I've taken PageSpeed scores from 60 to 90), clear communication, and owning work end to end. Now looking for remote contract work with small teams that move fast.

SKILLS

- **Frontend:** HTML5, CSS3, SCSS, JavaScript (ES6+), React, Next.js, Tailwind CSS, Bootstrap, Astro, Responsive Design
- **CMS:** WordPress, WooCommerce, ACF, Elementor, Bricks Builder, Oxygen Builder, Avada, Webflow, HubSpot, Sanity
- **Backend & APIs:** PHP, REST APIs, JWT, Supabase, Firebase, MySQL, PostgreSQL
- **Automation & Integrations:** Zapier, n8n, Twilio, EmailJS, Resend, Botpress, Typebot
- **Performance, SEO & QA:** PageSpeed / Core Web Vitals, Rank Math SEO, GA4, GTM, PostHog, Selenium WebDriver, Manual QA
- **Tools & DevOps:** Git, GitHub, Jira, ClickUp, Agile/Scrum, AWS, Docker, Cloudflare, Figma
- **AI:** Cursor, Claude, Gemini, Hugging Face, Groq, MCP integrations

EXPERIENCE

Software Engineer | Korrall Consulting LLC | USA (Remote) **Jan 2026 – Present**

- Develop SaaS products and web applications for 3 clients through outsourced development engagements.
- Build AI-powered features, API integrations, authentication systems and cloud backends using Next.js, React and Supabase.
- Implement payment processing, session management and secure data-sharing features for browser-based applications.
- Coordinate a team of 5 software engineers and SEO marketers, managing timelines, priorities and deliverables to ship on schedule.
- Gather client requirements, report progress and translate business needs into technical specifications and development plans.

Web Developer | Xgrid | Islamabad, Pakistan **Mar 2024 – Jan 2026**

- Developed 10+ enterprise websites on WordPress, Webflow and HubSpot for clients including **Alkira**, **Chkk**, **GiveCampus** and **OKFB**, improving scalability, performance and deployment efficiency.
- Built reusable ACF components and Bricks Builder templates for dynamic, maintainable content systems.
- Ran Selenium-based automated tests to ensure cross-browser and cross-device compatibility.
- Collaborated in Agile teams with developers, designers and SEO specialists to deliver projects smoothly.

PROJECTS

SaveSquare.io — AI Bookmark Browser Extension (SaaS) | Next.js, React, WXT, Supabase, Cloudflare Workers, Creem — savesquare.io

- Built an AI-powered bookmark management and sharing SaaS as a browser extension.
- Integrated Supabase, Cloudflare Workers and Creem for the backend, AI processing and subscription payments.

Rejuvenated Knives — WooCommerce Store | WordPress, WooCommerce, Bricks Builder, ACF, PHP — get.rejuvenatedknives.com

- Developed a full WooCommerce store with product management, checkout and Stripe payments.
- Built reusable global templates with Bricks Builder and ACF for scalable content management.

Oklahoma Farm Bureau Insurance (USA) — via Xgrid | WordPress, ACF, Rank Math SEO — okfbinsurance.com

- Improved PageSpeed and Core Web Vitals, and provided ongoing maintenance and updates
- Managed SEO for 100+ pages with Rank Math, including meta title and description updates.

Chkk.io — AI & Cloud Platform — via Xgrid | Webflow, Figma, HTML, CSS, BEM — chkk.io

- Converted Figma designs into pixel-perfect, responsive Webflow CMS pages using Flexbox and Grid.
- Built scalable UI components with BEM for consistency across pages and devices.

GiveCampus — Fundraising Platform — via Xgrid | HubSpot, Figma — go.givecampus.com

- Built 5 HubSpot landing pages from Figma designs for lead-generation campaigns, with integrated HubSpot forms for lead capture.

Alkira — Cloud Networking Platform — via Xgrid | WordPress, Avada, JavaScript, CSS — alkira.com

- Redesigned the enterprise website in Avada with improved UI/UX and responsive structure; added custom Splide.js sliders and improved frontend interactivity.
